

FREE AOG TRAINING SEMINARS

For the fifth year running, Dynapumps is offering technical training lunch seminars in conjunction with the 2016 AOG Expo. This year we have four seminars available for client attendance, detailed as below. All seminars will be held in the Meeting Room in the Exhibition Hall. **Tickets to the exhibition, food & beverages will be provided for all attendees. Spaces are limited, click here to register.**

API 675 Nexa Series

1-2pm Wednesday 24 February, Day 1 of AOG

Massimo Orini, Systems Manager at Seko has travelled from Milan, Italy to attend the AOG and share his knowledge and share his expertise with our clients. This seminar will discuss API 675 requirements in detail with a focus on diaphragm leak detection and plunger size interchangeability.

Getting the best out of VPD Pump operation

1-2pm Thursday 25 February, Day 2 of AOG

Jurgen Mrozek, Product Manager Industry, will lead the seminar on benefits of operating centrifugal water pumps and systems with Variable Frequency Drives (VFD) and the importance of having pump and application knowledge translated into appropriate operating logic. The session will highlight the importance of how intelligent solutions (iSolutions) optimise overall system Life Cycle Cost (LCC), as well as how iSolutions ensure reliability, comfort, ease of use and integration.

Future proofing - Integrated systems delivering improved operational performance & energy efficiency

3-4pm Thursday 25 February, Day 2 of AOG

The global market increasingly requires optimised solutions that deliver the highest levels of energy efficiency, reliability and operational life. Weg Australia's **Richard Walker and Renato Gualda** will present a seminar which discusses the current pressures of future proofing and how to integrate electric motors, frequency inverters and gearboxes/geared motors in systems that deliver improvements in operational performance and energy efficiency.

Helical Rotor / Progressive Cavity Pumps as a solution for Offshore Applications

1-2pm Friday 26 February, Day 3 of AOG

Netzsch are the world's largest supplier of Helical Rotor Pumps which are also known as Progressive Cavity Pumps. **Steve Weir** will host a seminar to discuss the innovative design and working principle behind these pumps and their applications in the Oil & Gas industry.

Spaces are limited, click here to register for any of the seminars

Dynapumps - bringing technical training to you
