

Encourage ownership for environmental responsibility among all employees, contractors and visitors through training, education and communication.

Comply with all applicable legal and statutory obligations.

Lead by example with good business ethics to protect our environment.

Strive to eliminate pollution, reduce waste and increase recycling of products that we sell and use by using the 5 "R" Principles.

- Rethink
- Reduce
- Reuse
- Repair
- Recycle

Monitor and evaluate our environmental responsibility through internal audits.

Provide information on our environmental initiatives to our clients and the public to encourage the concept of sustainable environmental growth.
